

Using the Share widget

Click the Share widget icon to open it.

Copy the short link under **Share a link to this app** and paste it into your email, instant message, and so on. You can also use the provided buttons to post your app to your Facebook, Twitter, or Google accounts, or in an email.

Optionally click **Link Options** to easily define URL parameters included in the short link. See [Use URL parameters](#).

Check the radio button or check box to add a URL parameter from the following options. You can preview the URL change in the **Link preview** box.

Current map extent—This is used by default.

Click the map to define the center of the map with zoom level—A point icon shows under the option when it is checked. Click the icon and click where you want the map to center in the app. A point marker will be added on the map and the URL in the link preview will be updated accordingly based on the map zoom level.

Click the map to define the center of the map with map scale—A point icon shows under the option when it is checked. Click the icon and click where you want the map to center in the app. A point marker will be added on the map and the URL in the link preview will be updated accordingly based on the map scale.

Find the location or feature and zoom to it—Input a location in the box, such as Redlands, ca, 92373, or a feature in a searchable layer.

Query a feature and zoom to it—Choose a layer, a field and a value from the drop-down menus to query a feature and zoom to it.

Add a marker on the map—Click the point icon and click where you want to add a marker in the map. Fill in the **WKID**, **Pop-up title**, **Symbol**, and **Label** properties in each text box.

Overwrite default screen size of mobile layout—Input the screen size in pixels. By default, when either the height or width of a screen display is less than 600 pixels, the mobile layout automatically applies.

Set display language of the app—Choose a language from the drop-down menu.

Authenticate a user automatically—Input a token. By default, your log in credentials display in the text box when the option is checked.

Click -> to return to the main panel. The short link should be updated to reflect the URL change made in the step above.

Under **Embed this app in a website**, copy the HTML code and paste it into your website. If you want, click **Embed Options** to choose the size of your app to be embedded.
